To-Ka®

History

Domestic and international investors founded Perfektüp Packaging to produce aluminum slugs and tubes.

1955

Perfektüp has become an international company this year by making its first export.

1969

Perfektüp began producing aluminum monobloc aerosol cans.

1975

Perfektüp began producing laminate tubes.

1993

Perfektüp reinforced its presence in Europe by opening a fully operational aluminum tube factory in Bulgaria.

2011

2019

Since Industry 4.0, Perfektüp has modernized operations and advanced digital transformation, including establishing an R&D department.

2020

Perfektüp has started the construction of its new factory in Kırklareli.

2022

By acquiring Milan-based Tubettificio Favia, Perfektüp strengthened its European presence and pharmaceutical market position.

2023

Joining the Turquality Brand Support Program boosted Perfektüp's brand value and strengthened its international competitiveness.

TURQUALITY®

2024

Perfektüp's Kırklareli production facility became operational with its first aerosol line.

Why Perfektüp?

Trust and know-how thanks to almost 70 years of uninterrupted production.

Customer oriented, product focused solutions.

7 production facilities in Türkiye, Italy and Bulgaria.

High production capacity with 30 production lines.

680+ specialized employees.

R&D department that develops innovative products and efficiency-enhancing projects.

Export network covering about 50 countries and 200 customers.

Production in accordance with international quality standards.

100% customer satisfaction.

Impressive packaging designs with state-of-the-art printing methods.

Sustainability-oriented solutions at every phase of production.

We serving in pharma, personal care, cosmetics, home care, food, chemical and stationery.

ALUMINIUM TUBES

AEROSOL CANS

LAMINATE TUBES

Aluminium Tubes

Timeless, Trusted, Sustainable

A Century of Innovation

- Aluminium tubes have been transforming packaging since the late 19th century.
- Originally used for toothpaste, creams, and paints, they combined durability, hygiene, and convenience, setting a global standard.

A Timeless Choice

- From historical applications to modern, high-tech production, aluminium tubes remain versatile, reliable, and classic.
- Ideal for cosmetics, pharmaceuticals, food, and personal care products, they continue to protect and preserve your brand's quality.

Sustainable and Modern

- Lightweight, fully recyclable, and protective, meeting today's environmental standards.
- Supports a sustainability-oriented production approach, reducing waste and environmental impact.
- Combines eco-friendly materials with high functionality, making it a packaging solution for both today and tomorrow.

Laminate Tubes

Performance, Protection, Sustainability

High-Performance Packaging

- Perfektüp laminate tubes combine multi-layered barrier technology with optimized material usage, ensuring durability, product protection, and reduced environmental impact.

ABL vs. PBL

Aluminium Barrier Laminate (ABL):

- Excellent oxygen, moisture, and light barrier
- Ideal for highly sensitive products
- Premium protection for cosmetics, pharmaceuticals, and specialty applications

Plastic Barrier Laminate (PBL):

- EVOH-based barrier with softer touch and enhanced printability
- Fully recyclable and lightweight
- Suitable for less sensitive products with sustainability focus

Tailored for Your Brand

- Custom diameters, volumes, and shoulder-cap combinations for industry-specific needs
- Premium printability with offset, flexo, and letterpress techniques (up to 7 colors)
- Optional membrane seals and various closure types (flip-top, snap-on, stand-up, octagonal)

Industries Served

- Cosmetics & Personal Care
- Pharmaceuticals & OTC Products
- Food & Oral Care
- Homecare

Pharma-Grade Quality

- Produced under strict GMP protocols ensuring hygiene, traceability, and product integrity.
- Designed to meet the most demanding regulatory standards for sensitive formulations.

Aerosol Cans

Elegance, Protection, Sustainability

Aerosol Packaging with a Legacy

- Over 70 years of expertise in aluminium packaging.
- 240 million aerosol cans produced annually, demonstrating high production capacity.
- Advanced manufacturing facilities equipped with cutting-edge technology.

Tailored to Your Brand

- Customizable designs: diameters ranging from 35mm to 53mm, with various lengths and shapes.
- High-definition printing options to enhance brand identity.
- Pressure resistance up to 18 bars, ensuring product safety and reliability.

Sustainable and Modern

- 100% recyclable aluminium, supporting eco-friendly initiatives.
- Refillable options available, promoting sustainability.
- Lightweight and durable, combining functionality with elegance.

Ideal for Diverse Applications

- Cosmetics and Personal Care: deodorants, hair sprays, and more.
- Pharmaceuticals: spray medicines and topical treatments.
- Household Products: cleaners and air fresheners.
- Food and Beverages: aerosol-based food products.

The New Kırklareli Production Facility is Now in Motion

- Strategically located between İstanbul and Europe.
- 75,000 m^2 of land and 100,000 m^2 of closed area.
- 240 Million Aerosol Can production capacity!

Just some of the planned solutions for a sustainability oriented approach that minimizes environmental impact:

- Waste gases treated to reduce environmental harm.
- Aluminum scraps are compressed and sent for recycling.
- Rainwater collected for irrigation and firefighting purposes.
- Solar panels installed on the roof to harness renewable energy.
- Water used in production is treated and reused within the factory.

Circular Economy Advocate

Perfektüp is deeply committed to the **principles of the circular economy**, actively promoting a regenerative approach to minimize waste and maximize resource efficiency across all our operations.

Zero Waste Vision

Our goal is to **achieve zero waste in packaging** production processes, through meticulous waste management strategies and by **prioritizing recycling** and reuse to ensure that every resource is valued and conserved.

Eco-Design

At the heart of our product development is eco-design, focusing on **creating packaging solutions** that are not only sustainable but also optimized for efficiency and effectiveness, **reducing environmental impact** from the outset.

Energy Efficiency

We invest in **energy-efficient manufacturing technologies** and practices, reducing our carbon footprint and leading the way towards a more sustainable production paradigm that respects our planet's resources.

Water Stewardship

Implementing rigorous **water conservation practices**, Perfektüp is dedicated to stewarding **water resources responsibly**, ensuring that our use of water is efficient, sustainable, and mindful of community and environmental needs.

Recycling as a vision

We actively **champion recycling practices**, not just within our own operations, but also by encouraging and facilitating recycling efforts in the communities where we operate.
