INFORMATION SECURITY POLICY

As Perfektüp, in order to manage all kinds of risks to our business continuity and information assets;

- Identification of information assets, assessment of risks to the confidentiality, integrity and availability of these assets and implementation of controls to mitigate these risks,
- Meeting the safety requirements of all legal requirements,
- Carrying out trainings in order to increase awareness of information security and make it a company culture,
- We manage our activities for measuring and continuously improving the performance of the information security management system in an integrated manner with other management systems we implement.

We aim to be an exemplary and leading organisation at the level of operational excellence by ensuring our leadership in the packaging sector in the field of information security with our policy-related practices.

CHAIRMAN OF THE BOARD

Livio MANZINI
