SUSTAINABILITY POLICY

As Perfektüp Ambalaj, we address sustainability activities in the context of social, environmental and economic dimensions. We believe that we will carry the society and our world to a better future with our sustainable solutions in all processes starting from raw material supply to the final consumer.

In line with this purpose, our company;

- To produce sustainable packaging in accordance with laws and regulations within the framework of sustainability principles for all our stakeholders that we interact with throughout the supply chain,
- To spread awareness on sustainability throughout our value chain by giving importance to the follow-up of sustainability criteria throughout our supply chain,
- To ensure end-to-end sustainability by using resources (aluminium, energy, water) in the most efficient way to meet the needs of present and future generations, reducing and transforming them at their source, while observing the balance and cycle of nature,
- To evaluate the environmental and social risks of our investments and to take measures to minimise our impacts,
- Investing in high technology within the scope of combating climate change, improving our processes by considering energy efficiency, and transparently reporting our performance according to international standards,
- To calculate emission emissions from activities to combat climate change and to set mitigation targets,
- To observe national and international emission targets within the scope of combating climate change, to reduce energy consumption, to increase energy efficiency and to carry out studies to reduce our direct and indirect greenhouse gas emissions in order to provide added value to the low carbon economy, which is one of the cornerstones of sustainable development,
- To help protect nature and the environment by investing in renewable and clean energy,
- Making the sustainability perspective a corporate culture and endeavouring to raise awareness in this area among both employees and stakeholders,
- To create conditions that will make the working environment more efficient by aiming to increase the loyalty and welfare of employees,
- To see developing and implementing practices that will ensure improvement in the field of occupational health and safety as part of the work,

- To ensure and supervise the applicability of sustainability practices in our subsidiaries and affiliates and to organise trainings to inform the company personnel in this regard,
- To comply with the laws regulated on the protection of personal data,
- To adhere to values related to business ethics and morality,
- Not allowing bribery and corruption in any way, making regulations on this issue,
- To carry out sustainability activities in transparency, while considering the needs of stakeholders, employees, shareholders and suppliers,
- To work to develop sustainability policies within the corporate governance approach,
- Ensure equality of opportunity with regard to race, sex, marital status, age, colour, colour, religion, ancestry, national origin, disability and other protected sta
- To enable the use and development of innovative technologies that will contribute to sustainable development,
- To provide equal rights to employees in employment, career management, remuneration, performance evaluation, etc. by preventing all kinds of discrimination,
- It is committed to endeavour to increase women's employment at all levels by supporting the development of women's employment and qualified active participation.
